Skalent[®] INDIA x LEGO[®] SERIOUS PLAY[®]

What is LEGO® SERIOUS PLAY®?

Give your brain a hand! Creative methods release new insights – which is why successful companies use LEGO®, creative visualization and serious play as a method. LEGO® SERIOUS PLAY® is a recognised and tested tool for Strategy Development, Innovation and Team Development

Why LEGO® SERIOUS PLAY?

Play isn't just for kids—you might also see “serious play” as a contradiction, but research shows otherwise. Play helps us relax control, open our minds, and imagine new solutions. It also strengthens relationships and enhances collaboration. And what if we told you that the child in you—the one who loves to play—can also solve real business challenges?

The LEGO® SERIOUS PLAY® methodology and materials foster a psychologically safe environment, enabling participants to express past experiences, future aspirations, and present challenges. This hands-on, thoughtprovoking approach allows for deep reflection, creative problem-solving, and impactful decision-making.

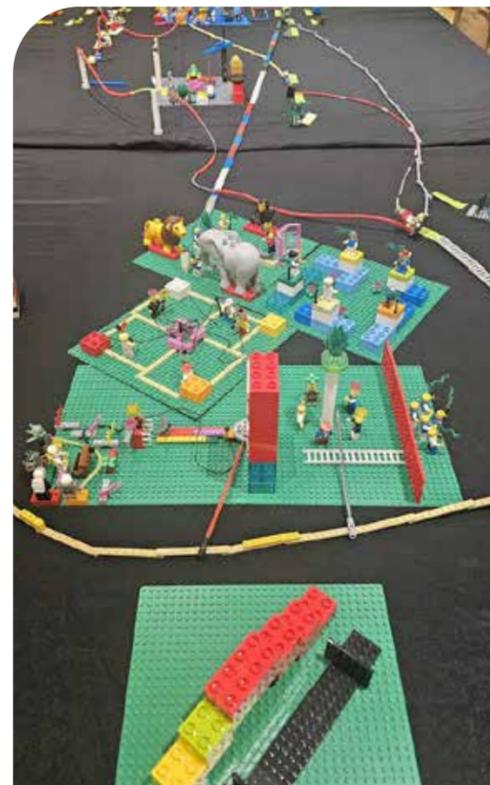

Skalent® INDIA X LEGO® SERIOUS PLAY®

As Certified Trained Facilitator of LEGO® SERIOUS PLAY® (LSP), Skalent x LSP a powerful methodology that builds new collective knowledge and unlocks fresh perspectives. Rooted in Serious Play, Constructionism, Imagination, and 4D Adaptive Knowledge Systems.

Guided by the principle: **'Let your hands do the thinking'**, the LEGO® SERIOUS PLAY® methodology follows six dynamic phases:

- **Skill-Building** – Focusing on foundational competencies.
- **Building Models** – Constructing both individual and collective representations.
- **Storytelling with Models & Agents** – Bringing ideas to life through tangible connections.
- **Creating a Causal System** – Establishing interdependencies within the landscape.
- **Exploring Challenges & Testing Scenarios** – Identifying barriers and solutions.
- **Deriving Simple Guiding Principles** – Transforming insights into concrete action plans.

With a wide range of applications,

Skalent[®] INDIA x LEGO[®] SERIOUS PLAY[®] association provides:
